Aviation Security in the Digital Age

NextGen will move the air transport system to satellite based surveillance instead of ground based radar.

Increased use of information technology means greater exposure to cyber attacks.
Aviation Security and the Digital Age

Reduction of manpower and increase use of IT to reduce cost and increase efficiency

Airports and airlines facilitating the IT savvy passenger by facilitating the use of e-ticking and immigration kiosks
Are we prepared as a Region?

- Vulnerabilities in the Aviation Industry

November 2014 over 10 government websites to include Jamaica Civil Aviation Authority were the target of a “Denial of Service” attack.
